

Your Partner in Wood Finishing

GORI INDUSTRY

Teknos & GORI Industry at LIGNA 2009 Exhibition May 18–22 in Hannover, Germany

Welcome to our stand, where you will hear more about our modern paint and coating solutions for the wood industry. Besides our own strong brands, our product range also covers the well-known GORI Industry wood products.

You will find us in Hall 20, at Stand C34. Welcome!

Teknos focuses on wood – the recent acquisition of GORI Industry supports our strategy

A Finnish family business, Teknos has manufactured paints and coatings for over 60 years. Our company began manufacturing anti-corrosive paints in 1948; today, we are the market leader in industrial paints in various Central and Northern European countries. Teknos has production facilities in Finland, Sweden, Denmark and Germany. Our sales organisation and distributor network cover almost the whole of Europe.

Within the Industrial Wood segment Teknos focuses on water-borne, UV hardened and solvent-free products. Teknos' plant in Denmark was the first in Europe to start providing water-borne paints for the window industry; this began in 1978, more than 30 years ago.

Teknos' latest investment in the wood industry occurred in January 2009, as GORI Industry wood business operations were transferred from Dyrup A/S to Teknos. GORI Industry is an established provider of wood preservers and water-borne industrial wood coating products in Central Europe. Our environmentally friendly strategy and long experience have brought us many new projects and customers, particularly in the last few years.

In addition to the environment, the overall economic efficiency of surface treatment agents (consumption per "unit" and recyclability)

has become increasingly important in the wood industry's surface treatment processes. These are essential factors when attempting to gauge our customers' competitiveness in their own markets.

At Teknos, we are prepared to join forces with our customers and partners to develop competitive and innovative solutions, even in this tough market situation.

You are welcome to familiarise yourself with our products at the Ligna fair, held in Hannover, Germany, from 18 to 22 May 2009. Our stand is located in hall 20, C34.

We will also display the newly launched joinery technologies from GORI at our stand and give further details on our recent acquisition of GORI Industry. GORI Industry representatives will be at our stand, demonstrating their products and welcoming all customers.

Welcome!

Kim Smith
Director, Industrial Wood Segment

Teknos solutions for the window and door industry

Teknos has more than 30 years' experience of providing water-borne paints and coating solutions for the window industry. Now, GORI Industry wood products complement this know-how. Teknos is the market leader in this segment in Germany, England, Poland, Czech Republic, Norway, Denmark and Finland.

GORI Industry wood products along with Teknos' Aquatop product family cover all the needs of the window and door industry:

- wood preservatives
- base coatings for various spreading methods
- special base coatings for exotic wood species
- top coatings for wooden windows and wooden aluminium windows
- top coatings for various application methods

User advantages provided by Teknos products include the following:

- extensive certification in various markets
- easy-to-use
- excellent coverage and fast drying
- overall cost-effectiveness
- excellent flow and surface appearance

New!

Next-generation high-quality indoor varnishes

- Excellent chemical resistance
- Excellent mechanical resistance
- Good filling ability
- Easy-to-use
- Overall economic efficiency

TEKNOCOAT AQUA 1879

One-component water-borne varnish for stairways, furniture and floors

TEKNOLUX AQUA 1429

Water-borne UV varnish for stairways, furniture and floors

UVILUX 1456, UVILUX 2420, UVILUX 2070

100 % UV varnish system for furniture and floors

Industrial surface treatment of facade elements

An expert in surface treatment, for 20 years Teknos has placed an emphasis on wood construction in various projects. Our extensive range of products provides:

- Wood preservatives..... **TEKNOL AQUA**
Transparent and opaque
- base coatings..... **TEKNOL 1888, 1881 AND 2881**
- Top coatings..... **NORDICA EKO 3330**

On-site advantages of industrial surface treatment over painting:

- adhesion of paint is optimal right after planing
- competitive prices
- uniform quality without exceptions
- painting conditions have been standardised

Wood is a renewable and natural construction material that is able to compete with other materials when surface coated in advance.

High solids content brings savings

Our new High Solid paints provide the solution for moving from solvent paints to water-borne paints when treating finger jointed wood and MDF plates.

TEKNOFILL 5700

One-component WB putty for box filling

AQUAFILLER 6400

Water-borne base coating for massive wood and MDF plates

TEKNOLUX AQUA 1600

Water-borne UV hardened paint for massive wood and MDF plates

In comparison to conventional water-borne paints, next-generation High Solid paints

- make wood and fibres swell less
- are still easy to use
- are economical, since fewer layers are required
